Ode to autumn

A vibrant and abundant season!

Did you pick your fill of fruits and vegetables from local growers, get carried away at the farmers’ market or harvest plenty of veggies from your garden? Here are five ways to enjoy and preserve your bounty all year long.

1. Pies. Use apples, plums, blueberries, pears and pumpkins to make delectable pies. Store them in the freezer for several weeks.

2. Jams. Nearly any fruit can be made into jam. In addition to being spread on toast, you can use your jams to brighten up baked goods like cakes, cookies and buns.

3. Pickles. Pickle beets, radishes, peppers, cucumbers and other tasty vegetables to create a tangy side dish.

4. Soups and broths. Vegetables like squash, onions, leeks and cauliflower are the perfect addition to soups and broths. Make a big batch and disfranchise it whenever you want.

5. Dried fruits and vegetables. Dried strawberries, apricots, tomatoes, carrots and kale have a long shelf life. They can be used in various recipes, including soups, salads, dressings and sauces.

Decorating tips: welcome fall into your home

Do you want your home to exude the warmth of the blazing fall leaves? Here are a few tips to welcome nature into your home this autumn.

FOCUS ON TEXTILES

Textured fabrics are a great way to add a touch of fall color to your decor on a budget. Heavy curtains and plush wool throws have a soothing effect. Moreover, table runners, napkins and cushion covers in varying shades of red, brown, orange and yellow instantly create an inviting atmosphere.

INCORPORATE NATURAL ELEMENTS

Pinecones, gourds, pumpkins, tree leaves and other natural elements are ideal for creating seasonal centerpieces and wreaths.

MAXIMIZE THE LIGHT

As the days get shorter, create a cozy atmosphere by installing string lights. These twinkle bulbs can brighten up rooms that desperately lack sunlight and can be used to showcase your banister or mantel. Decorative metallic objects are also great for reflecting natural light and making your space feel more inviting.

Lastly, scatter scented candles around your home and let their soothing scent envelop you.

Did you pick your fill of fruits and vegetables from local growers, get carried away at the farmers’ market or harvest plenty of veggies from your garden? Here are five ways to reduce waste and enjoy your bounty all year long.

1. Pies. Use apples, plums, blueberries, pears and pumpkins to make delectable pies. Store them in the freezer for several weeks.

2. Jams. Nearly any fruit can be made into jam. In addition to being spread on toast, you can use your jams to brighten up baked goods like cakes, cookies and buns.

1. Hiking. Take a walk in the forest or climb a mountain to observe nature in all its splendor.

2. Biking. Ride along bike paths in enchanting locations and admire the majestic multicolored trees as they pass by.

3. Kayaking. Waterways are often lined with trees and offer unique views of the beauty of autumn.

4. Picnic. Enjoy the season’s warm colors with a delicious meal in the open air.

5. Camping. Deep in the woods, the beauty of the rising or setting sun will make your environment shine.

10 activities to enjoy the fall colors

Are you looking for activities to brighten up your fall evenings and weekends? Here are some seasonal suggestions.

1. Pick local fruits or vegetables like apples, pears, pumpkins and plums
2. Attend a seasonal festival
3. Watch migratory birds
4. Visit a vineyard to enjoy a wine tasting or participate in the grape harvest
5. Plan a stay on the coast to take in the natural beauty of fall

12 outings to make the most of fall

Are you looking for activities to brighten up your fall evenings and weekends? Here are some seasonal suggestions.

1. Aerial trekking. Observe beautiful red, orange and yellow leaves up close by climbing or ziplining through the trees.
2. Spa. Unwind in an outdoor bath and take in the breathtaking scenery. Rejuvenation guaranteed!
3. Driving. Enjoy a leisurely drive along picturesque country roads or take a drive to the peaks.
4. Flying in a plane or helicopter. Discover fall like never before from high in the air.
5. Rock climbing. Contemplate the glorious fall panoramas as you dangle from a rock face at dizzying heights.

Lawn care: must-do fall chores

In the fall, you need to do several things to prepare your yard for the cold winter weather and ensure green and lush growth come spring. Here’s what you need to know.

HEDGES AND SHRUBS
Cut away leaves and prune stems and branches so the hedge can breathe and absorb more light. You should also cut back shrubs when they begin turning yellow or their stems start to show.

FLOWERS AND VINES
Bring potted plants inside and use burlap to cover plants that don’t handle the extreme cold. Dig up non-hardy bulbs like dahlias and cannas and store them in a cool, dry, frost-free place.

10 activities to enjoy the fall colors

The cool fall weather brings out a brilliant display of brightly colored leaves. Here are 10 activities to make the most of this short-lived season.

6. Admire an outdoor exhibition in a local park or museum
7. Explore a nearby corn maze or a farm for hours of family-friendly fun
8. Go to a farmers’ market and stock up on delicious vegetables for your preserves
9. Take in a show
10. Stargaze late into the night
11. Watch a movie at the drive-in before the end of the season
12. Participate in Halloween themed activities like haunted houses and ghost tours

Fall Tune-Up Specials

Roasted Pumpkin Hummus

If you love hummus, this creamy combination of chickpeas and roasted pumpkin is sure to become a seasonal favorite.

Ingredients
- 1 small pumpkin (about 500 grams), peeled, seeded and cubed
- 1 teaspoon of olive oil
- 1 teaspoon paprika
- 1 pinch of salt
- Juice of 1 lemon
- 2 tablespoons of maple syrup
- 2 tablespoons of tahini
- 1 can of chickpeas, drained and rinsed (save some of the liquid)
- 1 garlic bulb
- 1 teaspoon of ground coriander
- 6 tablespoons of olive oil, divided
- 1 teaspoon of fresh oregano
- 2 teaspoons of fresh thyme
- 2 tablespoons of fresh Italian parsley
- 4 Roma tomatoes
- 2 eggplants
- 2 green zucchinis, cut into thin slices
- 2 yellow zucchinis, cut into thin slices
- 10 fresh basil leaves, finely chopped
- 1 can of diced tomatoes
- 1 yellow bell pepper, finely diced
- 1 orange bell pepper, finely diced
- 5 cloves of garlic, finely chopped
- 1 onion, finely chopped
- 4 tablespoons of olive oil

DIRECTIONS
1. Preheat the oven to 375 F. In a large ovenproof pan, sauté the onion and 4 cloves of garlic in half the olive oil. When the onion is translucent, add the peppers and continue cooking for about 10 minutes. Season with salt and pepper. Add the chopped tomatoes and fresh basil. Bring the mixture to a boil. Reduce the heat and add one ladleful of hot broth at a time, stirring until the liquid is completely absorbed between each addition. Once almost all the liquid is gone, stir in the remaining olive oil, salt, garlic, pumpkin, thyme, and tarragon. Season with salt and pepper. Once the greens are well combined, add the remaining pepper and continue cooking for another 20 minutes.

Ratatouille

Have you harvested lots of delicious vegetables from your garden or stocked up on produce at your local farmers’ market? Whip up this fall classic and get ready to enjoy!

Ingredients
- 1 small pumpkin (about 500 grams), peeled, seeded and cubed
- 1 teaspoon of olive oil
- 1 teaspoon paprika
- 1 pinch of salt
- Juice of 1 lemon
- 2 tablespoons of maple syrup
- 2 tablespoons of tahini
- 1 can of chickpeas, drained and rinsed (save some of the liquid)
- 1 garlic bulb
- 1 teaspoon of ground coriander
- 6 tablespoons of olive oil, divided

DIRECTIONS
1. Preheat the oven to 425 F. In a large bowl, combine the pumpkin, 2 tablespoons of olive oil and the ground coriander. Toss until the pumpkin pieces are well coated. Spread evenly on a baking sheet lined with parchment paper. Cut all the pieces into small cubes to expose the tops of the cloves. Place the baking sheet in the oven and let cool for about 15 minutes. Hold the garlic bulb at the base, turn it upside down and squeeze out the roasted cloves. Place the pumpkin, garlic, 1 tablespoon of olive oil, basil, tarragon, oregano, thyme and oregano. Season with salt and pepper. Blend until the mixture is a uniform consistency with the chickpea liquid as needed.

Mini pumpkin pancakes

These spiced mini pancakes will start your day off right.

Ingredients
- 1 1/2 cups of flour
- 1 cup pumpkin puree
- 2 teaspoons of baking powder
- 2 teaspoons of baking soda
- 1 teaspoon of cinnamon
- 1/2 cup of sugar
- 4 tablespoons of olive oil
- 1 egg
- 1 cup of milk

DIRECTIONS
1. Preheat the oven to 425 F. In a large bowl, combine the ingredients and gently mix until smooth.

Wild mushroom risotto

This refined and comforting Italian dish will delight your guests.

Ingredients
- 10 ounces of dried wild mushrooms
- 1 cup of hot water
- 2 tablespoons of butter
- 1/2 cup of white wine
- 2 cups of arborio rice
- 2 French shallots, finely chopped
- 1/4 cup of grated Parmesan cheese
- 1 cup of hot water

DIRECTIONS
1. Rehydrate the mushrooms by soaking them in a cup of hot water for about 30 minutes. Drain and dry them on paper towels. Strain the water to remove any debris and the rosemary. Toasting them in a cup of hot water will add a smoky flavor.

2. In a saucepan, combine the chicken broth and mushroom water. Bring to a boil. Add the rice and cook until almost all the liquid is gone. Reduce the heat and add one ladleful of hot broth at a time, stirring until the liquid is completely absorbed between each addition. Once almost all the liquid is gone, stir in the remaining broth, salt, and pepper and continue cooking for another 20 minutes.

3. In a large skillet, sauté the French shallots in half the butter until translucent. Add the arborio rice and cook until it is slightly translucent.

4. Add the hot mushrooms and mushroom water. Heat until simmering.

5. Stir in the remaining butter, Parmesan cheese, and a pinch of salt and pepper. Serve in fancy bowls and garnish with a sprig of rosemary for 30 minutes. Cover the pan with a lid or aluminum foil. If you are stockpiling on produce at your local farmers’ market, you can save some of the liquid. Stirring until the mixture is a uniform consistency with the chickpea liquid as needed.
Ceiling fans are known for keeping your home cool on hot summer days. However, did you know that fans can help keep your house comfortable all year long? They can also help you reduce your energy bills. Here’s how.

**SUMMER**
A switch on your ceiling fan’s central unit allows you to operate it in a clockwise or counterclockwise rotation. Set your ceiling fan to turn counterclockwise during warm months to push air downwards and create a cool breeze.

A standard air conditioning (AC) unit uses 3,500 watts of power. On the other hand, a ceiling fan uses just 50. If you use ceiling fans, there are many summer days when you don’t need the AC. Ceiling fans also complement your air conditioning. Fans keep air flowing throughout the room and help maintain a constant temperature, so your air conditioner won’t operate as much.

**WINTER**
During winter, change your fan’s settings to spin clockwise at a low speed. The fan will redistribute rising warm air from your furnace throughout the room. You can turn your thermostat down and still be comfortable. Moreover, your furnace won’t work as hard, saving you money.

Lastly, ensure your fan blades are tilted at 12 degrees to provide sufficient airflow. However, if they’re angled at more than 16 degrees, they’ll cause too much wind causing loose objects to blow around the room.

You use your kitchen knives every day, so having an efficient place to store them is essential for your kitchen design. Here are four methods for storing kitchen knives.

1. **Under-cabinet block.** Some knife blocks come with a swivel and attach underneath your cabinets. Additionally, some under-the-cabinet designs are equipped with a fold-away drawer that separates and organizes your knife set.

2. **Magnetic wall strips.** Storing your knives on a magnetic strip attached to your wall or fridge frees up valuable counter space. Moreover, minimal contact with the blades means your knives will stay sharp.

3. **Knife blocks.** A knife block allows you to keep your knives close to your workstation for easy access. However, repeatedly inserting and removing them from the block can dull the blades.

4. **Drawer docks.** Drawer dock products protect and organize your knives, so choose one that suits what you need. A drawer dock is an excellent solution if you have young children because it stores sharp knives safely away and out of reach.

Upgrading your kitchen knife storage is easy. Visit your local home renovation store and ask about available products.

If you lack storage in your home, there are many unique ways to utilize your space more efficiently. Here are a few ideas to consider.

- **Purchase bags and bins specifically designed to fit underneath your bed.** If your bed isn’t high enough, you can get bed risers to give you more room.

- **Install a cabinet, shelf, or rack.** If you have an empty wall or door space, you can be surprised at how much you can fit inside.

- **Invest in under-cabinet racks that slide conveniently out of the way when not in use.** This is a great way to use the space underneath your cabinets and drawers.

- **If you’re looking for a new entryway bench or coffee table, consider buying one that has hidden storage space inside for odds and ends.**

- **Did you know your ceiling is a great place to store things?** For example, you can install overhead shelves in your kitchen to store various everyday goods.
**Pet-friendly decor ideas**

Home decor can be a challenge if you don’t want to compromise your pet’s happiness and comfort. Here are a few ways to lift your furry roommate from its bare state while making it easy on the eyes.

**CUSTOM-BUILT PET SPACES**

Build pet spaces in your home to replace structurally, still-shiny, short-lived furniture. For example, you can build a sleeping nook for your dog and keep the cute for car journeys. You could also take the unsightly cat tree out of your front window and build it in a window seat or a series of cute climbing shelves instead.

**FEEDING DRAWERS**

Do you want your cat or dog to come and go as it pleases? Fortunately, pet doors are a few ways to let your furry housemates in and out without having to open the main door. A combination doorknob at the entrance of your home, for instance, will let you control who enters the house. Another pet door is a great option for those who want to keep their pets separate from the rest of the house.

**PET-LOVING FABRICS**

Look for fabrics that are durable and easy to clean. A small area of radiant-floor heating will also give your pet a warm place to rest. Consider taking your local home renovation center to talk to your contractor about adding an island.
Should you choose an open or closed floor plan?

Open concept designs have been on trend for many years. However, the recent move towards working from home has led many to rethink their living spaces. This guide will help you decide which style best suits your needs.

OPEN CONCEPT DESIGN

Open floor plans allow you to make the most of a small space, enabling less-restricted movement and optimal light. Choose this design if you:

- Have small children. If you find the ideal solution for your family.
- Find your open concept home.
- Enjoy entertaining. This floor plan allows large groups of people to mingle and move around with ease.
- Need help with accessibility. An open household plans for their needs.
- Find the ideal solution for your family.

CLOSED CONCEPT DESIGN

Closed floor plans provide more individual solitude and give you more control over noise and air quality. Choose this design if you:

- Have small children. If you find the ideal solution for your family.
- Enjoy entertaining. This floor plan allows large groups of people to mingle and move around with ease.
- Need help with accessibility. An open household plans for their needs.
- Find the ideal solution for your family.

6 benefits of installing a water softener in your home

Hard water can damage your home’s plumbing and appliances and make your hair and skin feel dry. Fortunately, a water softener can remove minerals like calcium and magnesium to improve your water quality. Here are six benefits of installing a water softener in your home.

1. Reduced plumbing repairs. The minerals in hard water stick to the inside of pipes and can clog your plumbing and damage valves. Water softeners remove the minerals before they can do damage.

2. Longer-lasting appliances. Water softeners keep minerals out of your dishwasher, washing machine and water heater, causing them to break down. Appliances that operate with soft water last longer.

3. Lower energy bills. Scaly mineral build-up in your water heater forces it to work harder and it can build up in your water heater, forcing it to work harder and burn more fuel. Installing a water softener can improve your water heater’s efficiency.

4. Cleaner clothes. Washing clothes with mineral-rich water can cause your clothing to fade and give off a yellowish hue. Soft water leaves your clothes cleaner and makes them last longer.

5. Easier household cleaning. Hard water can damage your home’s plumbing and appliances and make your hair and skin feel dry. Fortunately, a water softener can remove minerals like calcium and magnesium to improve your water quality. Here are six benefits of installing a water softener in your home.

6. Softer hair and skin. Showers with soft water leaves your hair feeling soft and your skin hydrated. You also don’t need to use as much shampoo or conditioner.

“Marcia listened to our ideas for renovating an existing pole barn into a working winery and tasting room—then made them even better. A delight to work with, she’s now designing a remodel for our home.”

Should you choose a gas or electric fireplace?

A gas or electric fireplace can be a welcome and cozy addition to your home. However, you must consider the pros and cons before deciding which one’s best for your home. Here’s what you need to know.

INSTALLATION
Installing a gas fireplace is quick and easy if your home is already connected to a natural gas line. Gas fitting is dangerous and must be done by a certified professional. Conversely, an electric fireplace may be installed by you if you don’t have an accessible natural gas line. Remember that gas fitting is required even if there’s waste due to heat loss through ventilation pipes.

FLAMES AND HEAT
Gas fireplaces create real flames, while electric fireplaces aren’t hot to the touch and pose a danger to children and pets. Burning natural gas also creates the risk of a deadly carbon monoxide leak. Alternatively, electric heaters aren’t hot to the touch and don’t produce any damaging carbon or weather stripping.

SAFETY
Gas fireplaces are hot to the touch and can burn children and pets. Burning natural gas also creates the risk of a deadly carbon monoxide leak. Alternatively, electric fireplaces aren’t hot to the touch and don’t produce any damaging carbon or weather stripping.

ENERGY EFFICIENCY
Electric fireplaces are more efficient than gas fireplaces because they don’t burn fuel. Although gas fireplaces produce more heat, there’s waste due to heat loss through ventilation pipes.

5 ways to stay warm at home

1. INSULATION
First of all, a properly insulated house protects you from drafts and costly heating bills. So, before temperatures drop, make sure your windows and doors are properly sealed. Repair or replace any damaged caulk or weather stripping.

2. HEAT PUMP
Central or wall-mounted heat pumps are a great choice for people who love cozy warmth throughout their homes. These appliances are deeply advantageous, as they circulate warm air during the winter and act as air conditioners in the summer.

3. FURNACE
Furnaces are indispensable elements of many homes, whether they’re powered by electricity, propane, natural gas or oil. Many energy-efficient, eco-friendly models are available. Talk to specialist retailers to find one whose price falls within your budget and that will meet your home heating needs.

4. STOVE OR FIREPLACE
A variety of inexpensive and eco-friendly stoves and fireplaces are available on the market as primary heating sources or for providing extra heat. Whether they’re powered by electricity, propane or pellets, they add warmth to your home both beautifully and figuratively.

5. HEATED FLOORS
There’s no doubt that heated floors provide the ultimate in home heat. This type of radiant electrical system has to be installed under stone, carpet or ceramic tile floors. heated floors also ensure a uniform temperature from floor to ceiling and are completely invisible and silent.

Tips for choosing and using a backup heater

Most winter houses are heated by people improperly using backup space heaters. Therefore, it’s important to know how to use them safely: there are some tips for choosing and using a backup heater in your home.

- Fireplaces and wood-burning stoves give your home a cozy ambiance. However, they require regular maintenance, including cleaning the flue and chimney. Make sure to sweep your chimney at least once a year or when the creosote build-up reaches three millimeters on the flue liner walls. Place the ashes in a metal container with a raised bottom and store them outside, away from combustible materials.

- Gas-burning stoves are perfect for power outages and can heat up to 2,000 square feet of living space. You also don’t have to worry about cutting and carrying wood or doing any cleaning.

- Ensure your gas-burning appliance is approved by the American Gas Association (AGA) and that the fittings have been installed by a certified professional. Keep in mind that gas-burning stoves are hot to the touch and pose a danger to children and pets.

- Pellet-burning stoves burn specially designed pellets rather than wood. These heating appliances don’t require a chimney but must be vented outside and regularly maintained.

- Electric heaters are the safest backup heaters available. They’re portable and efficient. However, they don’t work if the power goes out. Always keep your electric heater at least three to four feet away from combustibles such as furniture and curtains, and never use a heater with an extension cord.

- Lastly, material-burning stoves produce toxic carbon monoxide gas, so installing a CO2 detector is wise. Consult a heating professional before making your final choice.

GREEN IDEAS
Eco-friendly ways to keep warm in winter

Depending on where you live, you may have no choice but to turn on your home’s heating system to stay warm in winter. But did you know there are several ways you can minimize your impact on the environment without limiting your comfort? Here are some things you can do.

ADJUST THE THERMOSTAT
For every degree you boost your home above 68°F, your energy consumption goes up by two to five percent. Therefore, it’s best to keep the indoor temperature between 65 and 69°F. If you’re still a bit chilly, a knit sweater and woolen socks can help keep you cozy.

REVERSE CEILING FANS
While you should set your ceiling fans to spin counter clockwise in the summer to create a cool breeze, reversing them to a clockwise direction in the winter will provide an updraft that recirculates heat downward.

STOP ANY AIR LEAKS
To compensate for the drafts, your home’s heating system needs to work harder and use more energy. You can locate air leaks by holding a candle near exterior doors, window frames and electrical outlets. If the flame wavers, apply weatherstrip or window film to seal the leak.

MODIFY YOUR DECOR
Another way to improve insulation around your windows is to hang thermal or blackout curtains. And if the tile or hardwood floors in your home are always cold, lay down rugs to keep your feet warm and help create a cozy atmosphere.

Keep in mind that taking these simple steps to help protect the environment will also lower the cost of heating your home. It’s a win-win situation.
